"I call, therefore, a complete and generous education that which fits a man to perform justly, skillfully, and magnanimously all the offices, both private and public, of peace and war"—MILTON.

THE PURPOSE OF MILITARY TRAINING AT THE CITADEL

The Citadel is a military college, but its chief concern is to prepare men for civil life. Because of the military record of Citadel graduates, there has grown up an erroneous impression that the institution exists to prepare men for war. The college is justly proud of the war records of its sons, and it will always expect them to respond in national emergencies, but its chief purpose is to prepare men for civil pursuits by giving them a sound education reinforced by the best features of military training.

Military training teaches the value of system and order in approaching tasks, of physical and mental fitness, and of alertness and self-confidence. It teaches how to command and how to obey, how to organize and coordinate and how to maintain morale and discipline. Most important of all, it instils the conviction that any sacrifice must be made when principle is involved and that truth, honor, and integrity are the basis of character. Such virtues woven into the lives of men will produce results for good, irrespective of the field in which they are applied.

A civic leader, no less than a military commander, must be prepared to meet difficult or hazardous situations courageously and effectively, to make decisions and enforce them, to lead when it is his duty to lead and to follow when it is his duty to follow, and to inspire confidence through his resourcefulness, honesty and courage. Such qualities The Citadel attempts to develop in its cadets.

The training is not given at the expense of academic education. On the contrary, the aim is to make academic training more complete and effective through development of soldierly virtues. Graduates in many vocations and in many parts of the world attest the value of the rigorous regimen of classroom, barracks, and drill field.

Many desirable characteristics do not grow out of scholarship alone; traditions and codes may more profoundly influence college men than the most scholarly lectures. For this reason, to its academic training, which it assiduously seeks to make vital, The Citadel adds the code of the cadet and the gentleman. The visible symbol of this is the proudly worn uniform, a constant reminder that Alma Mater expects of every son the poise and culture of a student, the public spirit and unselfishness of an enlightened citizen, the courage and loyalty of a soldier, and the honor and bearing of a gentleman.

COLLEGE CALENDAR FOR 1934-1935

1934

September 7, Friday—Examinations for Conditions and Admission.

September 8, Saturday—College opens, 10 A. M.

November 11, Sunday—Armistice Day.

November 29, Thursday—Thanksgiving Day.

December 21, Friday—Christmas Furlough begins, 12 noon.

1935

January 3, Wednesday—Christmas Furlough ends, 8 A.M.

January 21 to 25—First Semester Examinations.

January 28, Monday—Second Semester begins.

February 22, Friday—Washington's Birthday.

April 17, Wednesday—Easter Holiday begins, 1 P. M.

April 23, Tuesday—Easter Holiday ends, 8 A. M.

May 27 to 31,—Second Semester Examinations.

June 1, Saturday—Commencement.

ORGANIZATION

BOARD OF VISITORS

Col. John P. Thomas, *Chairman*.....Charleston, S. C.
Col. James G. Padgett, *Vice-Chairman*.....Walterboro, S. C.
Col. A. E. Hutchison.....Rock Hill, S. C.
Col. J. R. Westmoreland.....Pacolet, S. C.
Col. D. A. Spivey.....Conway, S. C.
Col. E. B. Jackson.....Wagener, S. C.
Col. Wade C. Hughs.....Walhalla, S. C.

EX OFFICIO

His Excellency, Ibra C. Blackwood, Governor, Columbia, S. C.
Gen. James C. Dozier, Adjutant General, Columbia, S. C.
Hon. James H. Hope, State Superintendent of Education, Columbia, S. C.
S. K. Nash, Esq., Chairman Military Committee, Senate, Sumter, S. C.
E. L. Fishburne, Esq., Chairman Military Committee, House of Representatives, Walterboro, S. C.

COLLEGE FACULTY

(In Order of Seniority)

GENERAL CHARLES PELOT SUMMERALL, LL.D.
President

LIEUTENANT-COLONEL JOHN WALTON LANG, Infantry, U. S. A.
Professor of Military Science and Tactics

MAJOR HUGH SWINTON MCGILLIVRAY, A.B., PH.D
Professor of English

MAJOR LOUIS KNOX, B.S., M.S.
Professor of Chemistry and Biology

MAJOR LOUIS SHEPPERD LETELLIER, M.S.
Professor of Civil Engineering

MAJOR NEWLAND FARNSWORTH SMITH, PH.B., PH.D.
Professor of Physics

MAJOR SMITH JOHNS WILLIAMS, A.B., M.A.
Professor of History

MAJOR HAROLD CARTER WINSHIP, A.B., M.A.
Professor of Modern Languages

MAJOR CLIFTON LECROY HAIR, B.S.
Professor of Mathematics

MAJOR JOHN ANDERSON, C.E.
Professor of Civil Engineering

MAJOR LEONARD AUGUSTUS PROUTY, A.B.
Professor of Psychology and Education

MAJOR MARION SMITH LEWIS, A.B., M.A.
Professor of Business Administration

MAJOR PAUL LEWIS RANSOM, Infantry, U. S. A.
Associate Professor of Military Science and Tactics

MAJOR EUGENE VILLARET, Coast Artillery, U. S. A.
Associate Professor of Military Science and Tactics

CAPTAIN CARL FRANCIS MYERS, JR., B.S.
Associate Professor of Mathematics

CAPTAIN ALFRED EMMANUEL DUFOUR, A.B.
Associate Professor Modern Language

*CAPTAIN MILTON BOONE KENNEDY, A.B., M.A.
Associate Professor of English

---

*On leave of absence for one year.

COLLEGE FACULTY—Continued

CAPTAIN JAMES KARL COLEMAN, B.S., M.A.
Associate Professor of History

CAPTAIN WILLIAM QUINTILLIS JEFFORDS, JR., Coast Artillery, U.S.A.
Assistant Professor of Military Science and Tactics

CAPTAIN RALPH MILLEDGE BYRD, B.S., M.S., PH.D.
Associate Professor of Chemistry

CAPTAIN ARTHUR PIERSON MCGEE, Infantry, U. S. A.
Assistant Professor of Military Science and Tactics

CAPTAIN LUTHER BRENNER, B.S., M.S.
Associate Professor of Physics

LIEUTENANT RALPH MUSE LYON, B.S., M.A.
Assistant Professor of Education

LIEUTENANT CHARLES T RAZOR, B.S.
Assistant Professor of Physics

LIEUTENANT JUSTUS ALVIN TIEDEMANN, B.S.
Assistant Professor of Business Administration

LIEUTENANT JAMES GERATY HARRISON, B.S., B.Litt., M.A.
Assistant Professor of English

LIEUTENANT JOE HENRY WATKINS, B.S.
Assistant Professor of Chemistry

LIEUTENANT GRANVILLE PAUL SMITH
Assistant Professor of English

LIEUTENANT HILLIARD GALBRAITH HAYNES, A.B., B.S. in C.E.
Assistant Professor of Engineering

LIEUTENANT WILLIAM SYLVESTER PRICE, A.B.
Assistant Professor of Modern Languages

LIEUTENANT FRANK CAMBRIDGE TIBBETTS, B.S., M.B.A.
Assistant Professor of Business Administration

LIEUTENANT RAY EDWARD DINGEMAN, *Coast Artillery, U. S. A.*
Assistant Professor of Military Science and Tactics

LIEUTENANT ROBERT WALLER ACHURCH, A.B., M.A.
Assistant Professor of Psychology and Education

LIEUTENANT PAUL RUPARD SANDERS, A.B.
Assistant Professor of English

LIEUTENANT EPHRAIM CLARK SEABROOK, B.S.
Assistant Professor of Mathematics

LIEUTENANT GEORGE CRAIG STEWART, Infantry, U. S. A.
Assistant Professor of Military Science and Tactics

Miss Esther Gaillard ..... *Secretary to the Commandant*

PART I
The College

HISTORICAL SKETCH

PREVIOUS to the year 1842, the state of South Carolina had two depositories for its arms and munitions of war—one known as The Citadel, in the city of Charleston; the other known as The Arsenal, in the city of Columbia. These were guarded by companies of enlisted men and trained officers, and were maintained at an expense of twenty-four thousand dollars a year.

It was Governor Richardson who made the suggestion that these garrisons be replaced by young men, who, while serving as guards, should receive military training, and instruction in the practical and mechanical arts. Under the administration of his successor, Governor Hammond, an act of the legislature was passed, on December 20, 1842, creating The Citadel and Arsenal Academies.

The board appointed by the governor to carry out the purpose of the act lost no time in performing its duty, and the faculty of The Citadel was elected on February 23rd following. By March 20th both The Citadel and The Arsenal were in operation.

In arranging the course of studies for The Citadel, the report of the board to the General Assembly says:

"The Board has aimed at a system of education at once scientific and practical, which, if their original design is carried out, will eminently qualify the cadets there taught for almost any station and condition of life.

"During the course, besides the usual branches taught at the primary schools in the State, they will be instructed in the history of South Carolina, modern history, the French language, every department of mathematics, bookkeeping, rhetoric, moral philosophy, architectural and topographical drawing, natural philosophy, chemistry, geology, mineralogy, botany, civil and military engineering, the constitutional law of the United States, and the law of nations. In addition to that course, they will be instructed in the duties of the soldier, the school of the company and the battalion, the science of war, the evolution of the line, and the duties of commissioned officers."

The Arsenal, at first co-equal with The Citadel, was soon incorporated with it, and had for its special function the instruction and training of the recruits forming what was known as the Fourth Class.

The first class, numbering six men, was graduated in 1846. C. C. Tew, the first honor man of his class, and proto-graduate of the institution, afterwards founded the Hillsboro Military Academy, North Carolina, was Colonel of North Carolina troops in the Con-

federate Army, and was killed at Sharpsburg, September, 1862, while commanding Anderson's brigade.

The value to the state of the military training given at The Citadel is strikingly shown by the fact that, of the two hundred and forty graduates before the close of the War between the States, about two hundred were officers in the Confederate service, and forty-three laid down their lives upon the battlefield. The list of Citadel officers in that great conflict is an honor roll of which any institution may well be proud.

There are two dates in the history of the state military academies which mark the boundaries of this great military struggle of the last century. Between January 9, 1861, and May 9, 1865, what a tragic history was enacted!

On the former date, Major P. F. Stevens, Superintendent, and a graduate of The Citadel, in command of a detachment of Citadel Cadets manning a battery of 24-pounders on Morris Island drove off the steamer, "Star of the West," which was attempting the relief of Fort Sumter—thus firing the first hostile shot of the war.

On the latter date, Captain J. P. Thomas, Superintendent of The Arsenal, and also a graduate of The Citadel, with the Arsenal cadets at his command, had a skirmish with Stoneman's raiders, near Williamston, S. C., thus firing the last shot of the war discharged by any organized body of confederate troops east of the Mississippi.

At the present time, the corps of cadets has an annual drill for the "Star of the West" medal, a handsome trophy for the best drilled cadet of the corps, presented to the institution many years ago by Dr. B. H. Teague, a veteran of the war. This medal gets its name from a piece of oak wood, in the form of a star, taken from the historic vessel.

At the fall of Charleston, in February, 1865, The Citadel was occupied by Federal troops. The corps of cadets was at that time in the field and never returned to the institution, which continued in the hands of the United States military authorities, in spite of the best efforts of the state to recover it, until 1881.

In that year, Governor Hagood said in his annual message to the General Assembly:

"The State Military Academy at Charleston has been suspended in its operations since the late Civil War. This has been due to the fact that the building known as The Citadel, in which it has its seat, has been since the close of the War in the possession of the United States authorities, and has been used by them until recently as a military post.

"It is understood that the General Government is now prepared

to restore it to the custody of the State. It is desirable that this property be recovered and again devoted to the purpose of higher education, in the facilities for which our needs are greater than the source of supply.

"A measure will probably be submitted to you at this session to accomplish this purpose and you will permit me to say that, in my judgment, it is now practicable to reopen the school, and it ought to be done."

An act to authorize the reopening of the South Carolina Military Academy was passed by the General Assembly, and approved January 31, 1882.

The Citadel was reopened on October 1, 1882, with 189 cadets, and has been in continuous and successful operation ever since.

In 1910, the legislature fixed the title of the institution as The Citadel, The Military College of South Carolina.

In 1918, the city of Charleston offered the state a magnificent tract of nearly 200 acres of land adjacent to Hampton Park, and beautifully situated on the banks of the Ashley River, for a Greater Citadel. The legislature accepted the offer and made in 1919 and 1920 appropriations for the necessary buildings.

On September 20, 1922, the college opened in its commodious new quarters, which had been provided at a cost of more than a million dollars. The facilities in laboratories and classrooms have been largely increased, dormitory accommodations have been enlarged forty per cent and ample and beautiful grounds for all military work and athletic activities have been provided.

The Mary Bennett Murray Hospital, erected at a cost of $60,000.00 by a public-spirited citizen of Charleston, was presented to the college in 1923, and is one of the most complete and well-equipped infirmaries in the South. In this year, also, the Alumni Hall was erected with a fund of $50,000.00 subscribed by graduates and former cadets.

During the year 1926, a new dormitory was constructed to accommodate 350 additional cadets. This building is called Andrew B. Murray Barracks, in honor of the citizen of Charleston who generously contributed half the cost of the construction.

In the year 1927, two faculty houses were constructed on the campus, one for the president, and the other, containing four apartments, for administrative officers and professors. In 1931, another building was erected to provide quarters for the dean and the commandant. Most of the professors have quarters in the Old Citadel at Marion Square.

GENERAL INFORMATION

ATHLETICS

The climate of Charleston permits open-air exercises throughout the year; and the setting-up exercises, daily drill, and the intramural sports of the cadets furnish the best means of securing bodily health and growth. Special attention may be given those cadets who may require particular exercises for specific needs.

The coaches of the various athletic teams are competent and experienced and use due care to prevent injurious training on the part of cadets who engage in athletics.

It is the policy of the institution to give every reasonable encouragement to athletics, and to see that all contests are conducted on a clean, amateur basis. The athletic interests are controlled by a well-organized athletic association, under the supervision of a board of control. The Citadel is a member of the Southern Intercollegiate Athletic Association.

A wide range of opportunity is offered to the cadet to find some branch of athletics in which he may excel or from which he may derive pleasure and profit. Regular teams are organized in football, baseball, fencing, tennis, basketball and relay racing. Attention has recently been concentrated on a program of improving facilities for recreational athletics. Added facilities include a swimming pool, a nine-hole golf course on the campus, six tennis courts, a quarter-mile cinder track with a 220-yard straightaway, necessary equipment for training a track team, and an adequately equipped auxiliary gymnasium. Cadets may arrange to take private riding lessons at moderate cost.

While intercollegiate athletics are encouraged and supported by the authorities, they are firmly subordinated to the prescribed work of the college, and nothing that will hamper the progress of the cadets in their studies, or introduce irregularities into the routine of the college, is permitted.

It is the observation of the authorities that clean, well-conducted athletics in an institution of learning fosters a fine spirit of loyalty and manliness. It is the purpose here to derive a full measure of this benefit, and in addition, to provide wholesome recreation for the cadets.

AUTOMOBILES

The keeping of automobiles at The Citadel by cadets is a privilege which may be revoked in individual cases for cause or may be revoked for all cadets in general.

The cars are to be used only during general or special leaves. No signs, lettering, slogans or words will appear thereon.

The Citadel assumes no responsibility for the safekeeping of automobiles.

Cadets will inform themselves of the requirements of the state and city concerning automobiles and their operation, and will comply therewith. State licenses are required.

CADET AFFAIRS

The Cadet Affairs include athletics, both intercollegiate and intramural; the canteen; the annual called *The Sphinx*; the weekly called *The Bull Dog*; the dances; the class fund; and other extracurricular activities. These are financed largely by the Cadet Activities Fee of $15.00.

The supervision of athletics rests with the Board in Control of Athletics. All other activities are under the control of the Cadet Activities Committee composed largely of cadets. All the activities are under the executive management of a faculty officer known as the Director of Cadet Affairs, who is ex-officio a member of and secretary to all committees. The Director of Cadet Affairs is also treasurer of the various cadet activities funds.

Canteen—A canteen carrying all the articles of ordinary necessity is operated in each barracks. The canteen stewards are selected cadets under the supervision of the Cadet Activities Committee. A barber shop and a tailor shop are under the canteen management. The tailor shop handles the cleaning, pressing and repair of uniforms. An expert tailor is in charge, and the shop is equipped to make most articles of clothing needed by cadets. The profits of the canteen are allocated to the various activities by the Cadet Activities Committee.

Publications—The *Bull Dog* is published weekly by a staff of cadets. It is financed by the cadet activities fees augmented by the revenue from subscriptions and the sale of advertising space. *The Sphinx* is published annually by its staff of cadets. The purpose of this publication is to provide a permanent record of the activities of each session in order that memories and associations may be preserved. The Cadet Activities Fee provides an allotment of $3.00 a cadet for *The Sphinx*. This is supplemented by the sale of advertising space.

Dances—The Citadel dances form an important part of the social life of the corps. These dances are managed and controlled by cadet committees under faculty supervision. The regulations governing these dances are simple. Frequent informal dances are

given, the music being furnished by the cadet orchestra. A small charge is made to defray the expenses of these informal dances.

Class Fund—There are five formal dances each year: the Thanksgiving Hop; the Christmas Hop; the Senior Hop; the Easter Hop; and the Commencement Hop. These are financed by the Class Fund, a fund made up of optional payments of $5.00 a cadet. A cadet paying this fee is admitted to these five dances without further charge. Cadets who pay for these dances separately find that the cost is much more. Patrons are urged to include the payment to the Class Fund in the first installment paid the quartermaster in order that the cadet may enjoy these dances at a minimum cost.

Other Activities—Other activities are: The Glee Club; "Pass in Review," a musical revue produced by the Glee Club; and the cadet orchestra, called "The Bull Dogs."

COLLEGE YEAR

The college year begins the middle of September and ends the first week of June.

It is divided into two semesters of four months each, and examinations are held at the end of each semester. Reports showing the records of the cadets in studies and conduct are sent to parents and guardians monthly and at the end of each semester.

FURLOUGH

A suspension of work for ten days, including Christmas Day and New Year's Day, is required by law.

The corps of cadets is furloughed from Commencement Day, in June, until the opening of the following session in September. There are Easter holidays of about six days.

During the session, furloughs will be granted only for some urgent reason, and parents are requested not to apply for leaves of absence for their sons unless in case of necessity. In every case the reason for the furlough will be stated, and it must be left to The Citadel authorities to determine whether the circumstances warrant the approval of the furlough. Parents applying for the admission of their sons to The Citadel relinquish control over them to the authorities of the institution. The time allotted to studies and military work is essential for the completion of the required courses, so that cadets must not be absent except when it is absolutely necessary; and the whole system of discipline depends upon uniform requirements for all, and no special privileges to any.

HAZING

One of the bugbears of college life, which has been talked about and magnified beyond its due importance, is hazing. The practice of hazing is fortunately getting less and less common in our colleges. It is a practice which should be totally abolished, because, if countenanced at all, it almost invariably is carried to an excess by a few irresponsible students.

At The Citadel, where all the cadets live together in two barracks, as one big family, the presence of individuals who are obsessed with the idea that beatings and indignities are a part of a student's education cannot be tolerated; and no student is wanted in the corps who does not subscribe voluntarily to the regulations which absolutely bar hazing from the corps.

The regulations concerning hazing are contained in the following resolution of the Board of Visitors:

> *Whereas,* The Statutes of the State make it unlawful for any student to engage in hazing (XXVIII, Statutes at Large, page 619), and
>
> *Whereas,* This Act requires the governing boards of all colleges supported in whole or in part by the State to formulate and issue such regulations as may be necessary to enforce this law,
>
> *Therefore, be it resolved,* That the Board of Visitors of The Citadel, in compliance with the law cited, hereby adopts the following regulation:
>
> 1. Every cadet will be required to subscribe to the following promise:
>
> I, (Name of cadet), hereby promise that I will not engage in hazing in any form during my connection with The Citadel.
>
> (Signature of Cadet.)
>
> 2. In any apparent case of hazing, where the facts do not come directly under the observation of the authorities, the commandant of cadets will require each cadet in the corps to make a statement whether he was involved in the case, and, if so, the facts relating to his connection therewith. In every case where a cadet is guilty of hazing, he shall immediately withdraw from The Citadel, and the facts in the case together with the statement of the cadet will be forwarded to the Board of Visitors.
>
> 3. The acceptance of these regulations by the parents or guardian of each cadet and also by the cadet himself

will be required before such cadet will be admitted to the college.

4. Hazing is defined to be striking, laying hands upon, treating with violence, or offering bodily harm to a cadet who has been connected with the college for less than one year, or other treatment of a harassing, tyrannical, abusive, insulting, or humiliating nature, or that may endanger the physical well-being of such cadet.

LIBRARY

The college library is situated on the third floor of Bond Hall and is easily accessible. It consists of a large, airy, and well lighted reading room, stack rooms and office for the librarian. It contains works of reference for all departments of the college, such as: the *Oxford English Dictionary;* the 14th edition, *Encyclopaedia Britannica;* the *Cambridge Modern History;* and the *Cambridge History of English Literature.* There are separate departmental libraries housed in the departments of Chemistry, Physics, and Civil Engineering, but all the books are cataloged in the college library. Large and important additions have been made in recent years by gifts from General C. P. Summerall; General Henry Jervey; Mr. James C. Allen; Mr. A. S. Salley, Jr., Class of 1892; Major W. St.J. Jervey, Class of 1894; Mr. T. E. L. Lipsey, Class of 1894; Mr. R. M. Lyon, Class of 1923; Cadet V. E. Stollbrandt, Class of 1935; Mrs. O. J. Bond; and Mrs. F. M. Robertson.

The librarian cooperates with the various departments by keeping in the reading room where they are easily accessible shelves of books related to the current work in the departments.

The reading room is plentifully supplied with current magazines and newspapers

LITERARY SOCIETIES

There are two cadet societies for the discussion of subjects of interest, and for the development of proficiency in public speaking: The Round Table and The Forum. Membership in The Round Table is restricted to a limited number of the most intellectual cadets, its members being selected from eligibility lists prepared by a committee of the faculty. Membership in The Forum is open to all cadets desiring to join. This society sponsors addresses, orations, and debates; several of its members have spoken over the radio.

RELIGIOUS SERVICE

The religious training of cadets is provided by daily morning prayer attended by the corps, by regular Sunday morning service conducted at The Citadel by the various ministers of the city, and by the Bible-study groups and other activities of the Cadet Y. M. C. A.

The military system works not only for the good health but for the morals of the cadets. Moreover, the barracks' life of the students precludes much waste of time or loss of character.

Cleanliness, temperance, regularity and courtesy are insisted upon, and personal responsibility and high sense of honor are stimulated and developed.

RESERVE OFFICERS' TRAINING CORPS

At The Citadel there are two units of the R. O. T. C.; infantry and coast artillery. The corps of cadets is organized into a regiment of a band and two battalions, one infantry and one coast artillery. Each battalion has its own barracks.

Seven carefully selected regular army officers and three non-commissioned officers are detailed by the War Department to conduct military training. Graduates are qualified for commission in the Officers' Reserve Corps of the Army of the United States.

At the close of the session in June of each year, juniors in the R. O. T. C. go to the government camps for the special training provided by the War Department. These encampments are closely supervised and furnish an excellent opportunity for the cadet to get a pleasant vacation and to meet college men from other sections of the country. Transportation, meals, housing, medical attendance and uniforms, and pay at the rate of 70 cents a day are furnished by the government.

All cadets who are not aliens are in the R. O. T. C. unless they fail to conform to War Department physical standards or are dropped for cause.

SYSTEM OF MANAGEMENT

The Citadel is essentially a military college, and all the students live in cadet barracks, under discipline like that in use at West Point. From reveille to taps, the Citadel cadet passes a full and busy day, every hour of his time being accounted for, and its appropriate task performed.

Leadership, initiative, and character are developed by placing upon cadets the great responsibility of controlling all units in the military organization.

The regular habits of study and living thus formed, the atten-

tion to duty, obedience to authority, and love of order inculcated are considered among the most valuable features of the education given. While few of the graduates of the college enter the military profession, hundreds in all the walks of civil life attest to the high value of the training received at the institution.

During the first five weeks freshmen are quartered in a separate barracks from upper-classmen, except for carefully selected cadet officers and non-commissioned officers, who are detailed as their instructors. Only these upper-classmen, and others who may be on temporary official business, are permitted to enter the freshmen barracks.

Y. M. C. A.

The Citadel Y. M. C. A. was organized in 1886, and is a valuable influence in the student life of the college.

While the faculty has oversight of the work, it is an institution of the boys, for the boys, and by the boys. Here all meet on equal terms; all cadets are welcomed, and there is thrown around the new student a wholesome atmosphere of personal interest, which enables him to meet more courageously and successfully the hard battles that every student must fight.

The supervision and extension of the work is in the hands of a student committee, cabinet, and an executive secretary, who devotes his entire time to the work at The Citadel.

The regular weekly meetings of the association are addressed by prominent clergymen, professional and business men of the city. At frequent intervals, these meetings are addressed by noted men from the greater religious, secular, and educational institutions of the country, speakers brought here by the city Y. M. C. A. Contact with these men is an education in itself, and the moral and religious influence of their helpful messages is most profound. A series of vocational talks finds place among the lectures delivered at these meetings.

The efficiency of association leaders and the effectiveness of the work are greatly increased by the yearly attendance of cadets at county, state, and international conventions and summer schools. Bible-study classes are organized each year, and taught by members of the faculty and the religious leaders of the city. Mission study is also provided for and from time to time the student's horizon is broadened through lectures by foreign work representatives. The religious problems of the homeland are also given due consideration.

A handbook, published by the association, is presented each year to the students at the beginning of the first semester.

Recreation rooms equipped with magazines, games, and radios are operated by the association for the enjoyment of cadets. Telephone service is also provided. The post office and the Y. M. C. A. office are located in the same room. The secretary performs many services for the cadets. Among these is the maintenance of a depository for the safe-keeping of money and valuables.

The faculty heartily commends the work of the association, and it is recommended that every parent or guardian encourage the student under his care to affiliate himself with the Y. M. C. A. as soon as he enters The Citadel.

EXPENSES

The Citadel is a state institution and is not operated for profit. The low fees charged by the college are further made possible because more than half the cost of maintaining cadets is borne by the state.

REGISTRATION AND TUITION

The registration fee of $5.00 is payable when cadet is enrolled and it is not returnable. The tuition fee is $60.00 for South Carolina cadets and $150.00 for out-of-state cadets.

MAINTENANCE

The charge for board is $144.00; for room, heat, light, water, laundry and hospital, $72.00. There is a breakage fee, not returnable, of $4.00.

UNIFORMS

As all cadets are required to be in uniform, which will be issued at the college, new students need not come with any supply of civilian clothing other than the suits they wear. It is advisable to bring inexpensive trunks or suit cases.

The cost of uniforms and other clothing varies among the students, and from year to year. Cadets should always have a deposit for clothing to their credit, no clothing being issued otherwise. The uniforms should last two or more years if cadets are careful, and the cost of clothing after the first year should be small. The average cost for the four years should not be more than for suitable civilian clothing.

A deposit of $10.00 for uniform is payable when the cadet is enrolled. For a new cadet requiring a complete outfit other payments are as follows: September 9, $50.00; November 20, $40.00; February 1, $40.00. The cost of a gray overcoat, which is optional, is $33.00. Many new cadets buy used overcoats, thus saving a part of this expense. All purchases of used uniforms must have the approval of an inspecting officer.

Parts of uniform and book deposits not used will be refunded.

OTHER FEES

Other fees required are: $15.00 for books; and a Cadet Activities Fee of $15.00, made up as follows: $1.00 for *The Bull Dog*, the cadet newspaper; $3.00 for *The Sphinx*, the cadet annual;

$9.00 for athletics; $2.00, required of Protestants only, for the Y. M. C. A. A payment of $5.00 for the class fund is optional.

SUMMARY

	S. C. Cadets	Out-of-State Cadets
Registration—not returnable	$ 5.00	$ 5.00
Tuition	60.00	150.00
Uniforms—		
Deposit when enrolled	10.00	10.00
Other payments	130.00	130.00
Maintenance—		
Board	144.00	144.00
Room, heat, light, water, laundry, and hospital	72.00	72.00
Breakage	4.00	4.00
Books	15.00	15.00
Cadet Activities Fee	15.00	15.00
Total	$455.00	$545.00

PAYMENTS

The fees for registration, tuition, uniforms, maintenance, books, and cadet activities for the first year are paid in amounts as follows:

	S. C. Cadets	Out-of-State Cadets
When enrolled	$ 15.00	$ 15.00
First installment, September 9	149.00	171.50
Second installment, November 20	107.00	129.50
Third installment, February 1	107.00	129.50
Fourth installment, April 1	77.00	99.50
Total	$455.00	$545.00

In settlement of all fees remittance should be made by money order or check made payable to E. M. Tiller, Quartermaster, and mailed to him direct.

The low fees and small appropriations at The Citadel are based on minimum current expenses. There is no reserve fund to carry accounts. All fees must therefore be paid in advance in the amounts and on the dates stated in the preceding tabulation. Where patrons are unable to make such payments it will be necessary to withdraw the cadets concerned.

GENERAL

The time of a cadet at The Citadel is completely taken up with

his duties, hence no sort of employment can be offered by which the expenses may be reduced. However, attention is called to the fact that juniors and seniors receive approximately $70.00 cash a session from the War Department, and if this is applied on college fees it will materially reduce the expenses of the last two years.

SCHOLARSHIPS

Detailed information regarding scholarships will be found on pages 27 and 28.

HOSPITAL

The hospital facilities at The Citadel are excellent, and all ordinary cases of sickness are treated by the surgeon and nurses of the college without expense to the parent. Surgical cases requiring the removal of a cadet to an infirmary in the city, services of a special nurse in the college hospital, and special treatment of eyes, ears, teeth, etc., must be at the expense of the parent or guardian.

CLOTHING AND BEDDING

All cadets are required to furnish their own bedclothes. Bedspreads and mattresses are provided by the college, but pillows are not. A mattress cover will be issued at cost to each cadet. Cadets should come provided with the following articles:

Six shirts, without collars preferred
Six suits of summer underwear
Four suits of winter underwear
Three nightshirts or pajamas
Six pairs of black socks
One dozen handkerchiefs
Six towels
One pillow
Three pillow cases
Four sheets for single bed
Two pairs of blankets
One comfort
Toilet articles
Two laundry bags about 24 x 26 inches
Two pairs *black* shoes, either high or low cut, with rubber heels.

Before the opening of the session, a new cadet is assigned a laundry number, which he retains as long as he remains at The Citadel. Clothing should be marked with the name and full initials, as well as with laundry number, as follows: sheets, towels, and handkerchiefs in the corner; pillow cases in corner at open end; collars on inside near center; shirts on bands near buttonhole at back of neck; socks on leg near top; other articles where most practicable.

REQUIREMENTS FOR ADMISSION

Applicants for admission to The Citadel must not be less than sixteen nor more than twenty-one years of age. They must be at least five feet in height and physically able to do military duty.

Formal application for admission must be submitted by parent or guardian on the blank provided at the back of this catalog and should be mailed to the registrar not later than September 1.

The requirements for admission to the freshman class are those prescribed by the Association of Colleges and Secondary Schools of the Southern States, of which The Citadel is a member. The standards of the association require "the satisfactory completion of a four-year course of not less than fifteen units in a secondary school approved by a recognized accrediting agency, or in a secondary school that is a member of this Association, or the equivalent of such a course as shown by examination."

In accordance with the above, applicants are admitted to The Citadel either by certificate or by examination. Certificates are accepted only from accredited schools, and should be submitted directly to the college by the principal or superintendent of such school. The certificate must give evidence of the satisfactory completion of a four-year high school course covering at least fifteen units, including those specifically required for entrance to The Citadel.

A unit represents a year's study in any subject in a secondary school constituting approximately a quarter of a full year's work.

No conditions are allowed.

Examinations for admission to the freshman class will be held at The Citadel on September 7. Permission to stand these examinations must be secured from the registrar prior to that date.

GROUP I—Required Units

The following units are required:

English	4
United States History	1
Algebra	2
Plane Geometry	1
Science	1
Total Required Subjects	9

GROUP II—Elective Subjects

In addition to the above, candidates must present at least six units from the following list, of which not more than three may be taken from those marked (*).

Ancient History	½ or 1
Modern History	1
English History	1
Civics (If not included with U. S. History)	½
Community Civics	½
Latin	2, 3, or 4
French	1, 2, or 3
German	1, 2, or 3
Spanish	1, 2, or 3
Solid Geometry	½
Plane Trigonometry	½
Physics	1
Chemistry	1
General Science	½ or 1
Physical Geography	½ or 1
Botany	½ or 1
Zoology	½ or 1
*Bookkeeping	1, or 2
*Stenography and Typewriting	1
*Commercial Arithmetic	½
*Commercial Geography	1
*Commercial Law	1
*Mechanical Drawing	1
*Agriculture	1, or 2
*Shop Work or Manual Training	1, or 2

ADVANCED STANDING

The courses of study at The Citadel are outlined on pages 32 to 39, and no student will be accepted as a candidate for a diploma who has not had this work, or its equivalent. It is therefore recommended that reference be made to the requirements for the freshman and sophomore years, before application is made for advanced standing. An applicant for advanced standing must present an honorabe discharge from the college previously attended together with a transcript of his college record and entrance credits. It is also advisable to submit a copy of the college catalog, in which the applicant has marked the courses which he has taken.

CHARLESTON CITY SCHOLARSHIPS

There are six scholarships maintained by the City of Charleston. Each of these is worth $250.00, which covers board ($144.00), the charge for room, heat, light, water, laundry, and hospital ($72.00), and $34.00 on the tuition account. Vacancies are filled by the city authorities.

		Totals	3	1	1	1

FIRST DIVISION A. E. F. SCHOLARSHIPS

There are five scholarships maintained by the Society of the First Division, A. E. F. These scholarships are valued at $550.00 each, which covers all college expenses, including uniforms and books.

In order that the benefits to be derived from this foundation may be available to applicants from any state in the union, one scholarship is awarded in each of the following districts:

1. First and Second Corps areas.
2. Third and Fourth Corps areas.
3. Fifth Corps area.
4. Sixth and Seventh Corps areas.
5. Eighth and Ninth Corps areas.

Candidates must fulfill the following requirements:

a. General worth and personality as indicated by qualities of manhood, truth, courage, devotion to duty, sympathy, unselfishness, and fellowship.

b. Exhibition of moral force of character and of instincts to lead one's schoolmates and take an interest in them.

c. Physical vigor as shown by interest and participation in manly sports.

d. Scholastic preparation sufficient to meet college entrance requirements and to do good work after entrance.

These scholarships were awarded in 1932 as follows:

1. W. A. Carr, Brooklyn, N. Y.

2. A. W. Ferguson, Bonaire, Ga.
3. D. G. McCree, St. Paul, Minn.
4. McD. Lowe, Highland Park, Ill.
5. A. L. Leonard, Jr., Los Angeles, Cal.

INDIVIDUAL SCHOLARSHIPS

The *William States Lee Scholarship*, the income from $6,000.00 in bonds; founded in 1925 by William States Lee of Charlotte, N. C. Holder: A. L. James, Darlington, S. C. Vacant 1937.

The *James R. Crouch Scholarship*, the income from $5,000.00 in bonds; founded in 1925 by James R. Crouch of Greenville, S. C. Holder: K. L. Perrin, Union, S. C. Vacant 1934.

The *Quinlan Scholarship*, valued at $550.00, covering all college expenses, including uniforms and books; established in 1933 by Colonel and Mrs. Dennis P. Quinlan, United States Army. Candidates must fulfill the same requirements as are prescribed for the First Division, A. E. F. scholarships. Holder: J. R. Caston, Matthews, N. C. Vacant 1937.

The *Colonel Robert R. McCormick Scholarship*, valued at $2,065.00 for four years, which is ample for all expenses at The Citadel; established in 1934 by Colonel Robert R. McCormick of Chicago, Ill. The qualifications are the same as for the First Division, A. E. F. scholarships. The first vacancy will be filled for the term commencing September 8, 1934. The selection will be limited to candidates from the state of Illinois.

HONORS AND AWARDS

THE SCHOLARSHIP MEDAL is presented annually by the Board of Visitors to the cadet graduating at the head of his class.

THE JOHN O. WILLSON RING, the bequest of Dr. John O. Willson, is given annually to the cadet of the senior class who is voted by his classmates the manliest, purest and most courteous member of his class.

THE ALGERNON SYDNEY SULLIVAN AWARD was established in 1925 by the New York Southern Society. The Citadel was chosen in 1933 as one of the colleges through which the award is to be made. A number of bronze medallions have been deposited at The Citadel which are to be used to give recognition and stimulus to high thought and noble endeavor and are to be presented by the college from time to time to students and to others, who, because of the quality of their lives, are judged to be appropriate recipients of this award.

THE STAR OF THE WEST MEDAL, originally presented to The

Citadel by Dr. B. H. Teague, is awarded annually for one year to the best drilled cadet.

THE W. C. WHITE MEDAL is presented annually by Mrs. W. C. White to the captain of the best drilled company.

THE COMMANDANT'S CUP, presented to The Citadel by Lieutenant-Colonel W. C. Miller, is awarded annually for one year to the best drilled company. The competitions for the Star of the West Medal, the W. C. White Medal, and the Commandant's Cup, are held as a part of the annual commencement exercises.

DEPARTMENTS OF INSTRUCTION

COURSES

The course of study is the same for all freshmen. Certain subjects are required in the sophomore year of all students, the remaining subjects being determined by the course which the cadet is to follow during his junior and senior years. Major work is offered in the following departments: Civil Engineering, Chemistry, Physics, English, History, Modern Languages, and Business Administration. A thorough pre-medical course is also offered.

A statement of the courses required each year in each department and a detailed description of the various courses will be found in the immediately following pages.

The session of thirty-six weeks is divided into two equal semesters. The unit of credit in the various courses is one hour a week for one semester—two hours of laboratory being counted as one. The standard course is one which has a semester credit of three; that is, a course which is taken three hours a week for one semester of eighteen weeks.

GRADES

The work of a semester is graded as follows: four monthly grades, each of a maximum value of one hundred, are recorded, based on the daily classroom work. At the end of the semester, an examination is held covering the entire ground gone over during the four months, the maximum mark being two hundred. The semester grade is then found by averaging the monthly and examination marks.

The monthly and semester percentages will be published only approximately by letter grade: A, representing an average of 90 to 100; B, 80 to 89; C, 70 to 79; D, 60 to 69; E, 50 to 59; F, below 50.

PASSING REQUIREMENTS

For promotion or graduation a cadet is required to have a final grade of C or better in at least half of the courses of his class and no grade below D; in addition, in the junior and senior years, he is required to have a grade of C or better in at least half of the courses in his major subject. A course in which the final grade is E will be marked "conditioned." No cadet will be advanced to a higher class with more than one condition. A course in which the final grade is F will be marked "failed;" no credit

will be given or condition allowed for such course; it must be repeated and a satisfactory record made, or an equivalent course taken.

CONDITIONS

Conditions may be removed by passing an examination or by repeating the course. Examinations may be taken in not more than two subjects. Except in the case of seniors, examinations for the removal of conditions are held immediately before the opening of college in September. A cadet who wishes to take an examination for promotion must notify the registrar in writing not later than September 1, specifying the subjects in which he wishes to be examined. If a cadet fails in the examination, a second examination will not be given until at least one semester has elapsed. A fee of two dollars will be charged for all such examinations not taken at the scheduled time unless a change of time has been authorized.

DEGREES

A minimum total of 144 semester hours is required for graduation.

The degree of Bachelor of Science is awarded upon the satisfactory completion of either the civil engineering, physics, chemistry, business administration, or pre-medical courses. The degree of Bachelor of Arts is awarded upon the completion of either the English, history or modern language courses.

The degree of Civil Engineer is awarded to graduates in civil engineering after at least three years of responsible work in their profession and the submission of a satisfactory thesis on some engineering subject.

COURSES OF STUDY

In the following pages will be found a detailed schedule of the required curriculum for each degree according to the major subject elected. The clock hours and the credit value of each course are noted. The individual courses are described under the appropriate departmental heading in the pages following the schedules.

The biology and geology courses are given in the Department of Chemistry; the drawing courses in the Department of Civil Engineering; the electrical engineering courses in the Department of Physics; the psychology courses in the Department of Education.

DEPARTMENT OF CHEMISTRY

MAJOR KNOX, *Professor*
CAPTAIN BYRD, *Associate Professor*
LIEUTENANT WATKINS, *Assistant Professor*

The Citadel's equipment for the study of chemistry is among the best in the South. It includes commodious, well-ventilated laboratories and lecture rooms equipped with the most modern furnishings and appliances for the comfort of the student and the efficiency of his work. Facilities are at all times maintained to allow the carrying out of a wide range of experimentation.

Students taking the Chemistry Elective are required to take all the courses in chemistry offered by the department and also German; if possible, geology or physics or both should be included as electives. Pre-medical students are required to take the first four courses in chemistry, Physics 2, Biology 1, and Psychology 1; if possible, German 2 should be taken as an elective.

BIOLOGY

Only one course is offered in this subject. The course is given primarily for students intending to study medicine. With this in view, it has been designed to conform with the requirements for admission to medical college. However, as it is indisputable that a knowledge of biology is of great cultural value, it is advisable that this course be taken by all students who find it possible to do so.

Biology 1. ELEMENTARY ZOOLOGY.—Required of all seniors taking the Pre-Medical Elective. Elective to other juniors and seniors. Lectures, two hours a week; Laboratory, four hours a week. Major Knox.

This course consists of the study of the various groups of animal organisms from the standpoint of anatomy, physiology and phylogenetic and ecological relationships. The ordinary routine of the classroom is, from time to time, varied by special lectures on many of the broader aspects of the subject, such as heredity, the cycle of the germ-cell, the pathogenic relationship of many organisms, and other similar topics.

In the laboratory the student undertakes individual microscopic examinations and dissections of representative types of the various groups.

Textbooks: Parker and Haswell's "Manual of Zoology"; Drew's "Invertebrate Zoology."

CHEMISTRY

Chemistry 1. ELEMENTARY CHEMISTRY.—Required of all sophomores. Lectures and recitations, two hours a week; laboratory, two hours a week. Captain Byrd; Lieutenant Watkins.

No knowledge of the subject is prerequisite for entrance. The more commonly occurring elements, their properties, modes of preparation and occurrence, and their individual behaviors and chemical relations are considered, and, as the student's knowledge of detail broadens, the underlying theoretical conceptions are carefully introduced and emphasized.

The student is provided with a textbook and a laboratory manual, and these are supplemented with demonstrative lectures and classroom discussions.

In the laboratory the student is assigned a desk where he undertakes individual experimentation illustrative of the classroom discussions. He is required to keep a note-book which is periodically inspected.

Textbooks: Holme's "Introductory College Chemistry;" "Experiments and Problems for College Chemistry."

Chemistry 2. GENERAL COLLEGE CHEMISTRY. — Required of juniors taking the Chemistry or Pre-Medical Elective; elective to other juniors and seniors. Lectures, three hours a week. Major Knox.

Chemistry 1 is required of all sophomores and is, thus, designed to meet the requirements of all broadly educated men. However, the time devoted to the subject and the elementary character of the work in that course are deemed inadequate as a foundation in general chemistry on which to base more advanced study. Chemistry 2 is, therefore, an extension of Chemistry 1. The study of reactions and principles is, at all times, more thorough and detailed than in the preceding course. Much attention is directed toward the physical side of chemical action, and problems bearing on the different principles under discussion are assigned. The most recent views of atomic structure are adopted and chemical affinity, ionization, valence and other phenomena are interpreted in the light of these views.

The textbook is supplemented with frequent lectures and classroom discussion.

Textbook: Kendall's "Smith's College Chemistry."

Chemistry 3. QUALITATIVE ANALYSIS.—Required of juniors taking the Chemistry or Pre-Medical Elective; elective to juniors and seniors who are taking or have completed Chemistry 2. Lec-

tures, one hour a week; laboratory, four hours a week. Captain Byrd.

This is a course in the qualitative determination of unknown substances. The student is first given simple "unknowns" containing one or two metals. He learns the methods whereby he may separate the different metals into groups and the manner in which these groups may be further resolved into individuals and the various reactions by which these individuals may be recognized. Following this he undertakes a similar study of the various common acids. As his skill and understanding advance, he is given more or less complex commercial products and naturally occurring substances, such as portland cement, limestone, phosphate rock, iron ores, and the like, for analysis.

No better medium exists for the exhibition of practically the entire range of chemical principles than the study of qualitative analysis, employing as it does, correct conceptions of hydrolysis, amphoterism, mass-action and equilibrium, and many other principles too numerous to mention. This aspect of the study is freely recognized and, at no time, does this course resolve itself into a blind rule-of-thumb execution of analytic processes, but the greatest emphasis is laid on the full comprehension of the various reactions employed and of the principles they illustrate.

Textbook: Engelder's "Qualitative Chemistry."

Chemistry 4. ORGANIC CHEMISTRY.—Required of seniors taking the Chemistry or Pre-Medical Elective; elective to other seniors who have completed Chemistry 2. Lectures, two hours a week; laboratory, two hours a week. Major Knox.

This course consists of the study of the various well-recognized groups of organic compounds, such as the paraffins, alcohols, fatty acids, amines, and sugars. Great emphasis is directed toward general reactions. Although the purpose of the course is primarily to develop theoretical comprehension and practical experimental skill in pure organic chemistry, discussions bearing on the practical application of this knowledge to the commercial or pathological side of life are undertaken whenever it is possible to do so.

In the laboratory, the student carries out syntheses and experiments paralleling the instruction in theory given in the lectures.

This course, together with the three preceding courses, completes the prerequisite training for those who propose to study medicine or pharmacy and affords excellent additional equipment for those who propose to teach chemistry or enter the technical field.

Textbook: Cohen's "Theoretical Organic Chemistry."

Chemistry 5. QUANTITATIVE ANALYSIS. — Required of seniors

taking the Chemistry Elective; elective to others who have completed Chemistry 2 and 3. Lectures, one hour a week; laboratory, four hours a week. Major Knox.

This course consists in the development of skill in carrying out the common quantitative determinations of substances. As the student grows in skill in the ordinary standard methods, he is given for analysis more and more complex materials, such as many of the ordinary natural and commercial products. Both gravimetric and volumetric methods are employed. In the lecture room, the various methods and their underlying principles are freely discussed and many intricate stoichiometric problems are analyzed and solved.

This course rounds out training for those cadets who intend to become pharmacists or to enter chemical laboratories as assistants.

Textbook: Talbot's "Quantitative Analysis."

Chemistry 6. INDUSTRIAL CHEMISTRY.—Required of juniors taking the Chemistry Elective; elective to juniors and seniors who have completed Chemistry 1. Lectures, three hours a week. Captain Byrd.

The aim of this course is to cover the chemical industries in a general manner, and it is designed for students who wish to gain a knowledge of industrial chemistry from the standpoint of manufacturing operations, together with the theoretical considerations necessary for a proper understanding of the subject. Lectures and classroom discussion are given throughout the year and written reports required on such subjects as: water for industrial purposes; fuels; lime, cement, and plaster; paint and pigments; fertilizer; petroleum products; explosives; and cellulose.

Textbook: To be announced.

Chemistry 7. PHYSICAL CHEMISTRY.—Required of seniors taking the Chemistry or Pre-Medical Elective. Lectures, two hours a week; laboratory, two hours a week. Captain Byrd.

A study of the properties of solids, liquids and gases, and of their relation to chemical constitution. Lectures, classroom discussions and solution of problems are undertaken on such subjects as: the general gas laws; atomic and molecular weights; thermodynamics; thermochemistry; atomic structure; electrical conductance and electromotive forces in aqueous solutions; ionic equilibria; heterogeneous equilibria; phase rule; and colloids. The student is required to perform the more common experiments given in an introductory course in physical chemistry and to submit written reports on them.

Textbook: Bell and Gross's "Elements of Physical Chemistry."

GEOLOGY

Geology 1. ELEMENTARY GEOLOGY.—Elective to all juniors and seniors. Lectures, three hours a week. Lieutenant Watkins.

In this course the following topics are considered: dynamic geology — crust-movement, igneous influences, and destructive agencies such as weathering, wind, running water, snow, and ice; structural geology—the composition, structure and arrangement of the igneous and sedimentary rocks; geomorphology—the physiographic aspects of the earth-crust and the contributing causes; a survey of historical geology—the well-recognized time periods, the rocks of the successive systems, and the origins and progress of life forms.

Textbooks: Miller's "Introduction to Physical Geology;" Miller's "Introduction to Historical Geology."

Geology 2. ENGINEERING GEOLOGY.—Elective to juniors and seniors taking the Civil Engineering Elective. Three hours a week. Lieutenant Watkins.

The course begins with the determinative mineralogy of the rock-forming minerals, their origin and union to form the three major divisions of rock. The petrology of the three divisions of rock is carefully worked out and the essential points in favor of or against the use of each as constructional material emphasized. Dynamic geology and the various forms produced as a result of dynamic action are carefully studied in relation to engineering work. The course concludes with a consideration of the making and interpretation of topographic and geologic maps, a study of building stones and economic geology, and a brief survey of historical geology.

Textbooks: Ries and Watson's "Engineering Geology;" Pirsson and Knope's "Rock and Rock Minerals."

DEPARTMENT OF CIVIL ENGINEERING

MAJOR LE TELLIER, *Professor*
MAJOR ANDERSON, *Professor*
LIEUTENANT HAYNES, *Assistant Professor*

The scope of modern engineering is so wide and its requirements so varied that engineering colleges must concern themselves largely with that compact body of principles that underlie all engineering design and construction. Once thoroughly grounded in this basic knowledge, the able engineering student is equipped to develop those specialized lines into which his professional career may

lead. Engineering, it may be noted, has come to represent, quite correctly, in the popular mind a *method* or a distinctive procedure for getting things done. A frank recognition of the effectiveness of engineering methods is evidenced by the large number of men in work quite unrelated to engineering in the ordinary sense, yet who employ the term "engineer" for the evident purpose of implying that they use in their work an effective technique for getting the best results at the least cost.

The engineering college, therefore, must not only seek to give its students a knowledge of the principles of science and technology, but must lead them to sense early in their careers that to this knowledge they must add skill in the characteristic methods by which engineers organize, coordinate, and direct engineering projects. With this attitude towards their work they can make their college course not only a preparation for the duties of a designer or a technician but a means of training for executive or managerial work in either technical or non-technical pursuits.

To accord with this conception of the engineer as an exponent of a sort of philosophy of method and technique in approaching problems, it is clear that his training along general and cultural lines should not be neglected. On the contrary, the most effective means of giving him an enlightened outlook on his professional duties and of keeping him out of the rut of technical routine is to insist that he shall have an intelligent interest in liberal culture and a broad conception of himself as a possible leader in making technology an effective means of solving economic, social, and political problems that face our present order.

None of this implies that the student's training in pure technology should be neglected. On the contrary, it is by insisting upon thorough and rigorous mastery of the fundamentals of pure and applied science that the characteristic habit of rational approach to all sorts of problems is best developed. It may be said with assurance that the engineer with a statesmanlike attitude towards his profession is not likely to develop from the slovenly and half-informed technician, but rather from the man whose knowledge of his professional subjects is precise and comprehensive.

Laboratory Equipment.—The equipment now installed is sufficiently complete to enable the department to give instruction in making all tests ordinarily specified for both bituminous and non-bituminous materials, along with a fairly wide range of experiments on structural materials.

Supplies.—The department purchases and carries in stock all supplies and materials required in the drawing courses. These are

furnished to cadets at cost, plus a small charge to cover freight and other expenses.

Drawing 1a. MECHANICAL DRAWING.—Required of all freshmen. Four hours a week; first semester. Lieutenant Haynes.

Use and handling of instruments; useful geometrical constructions; conics; cycloids; lettering; elementary projection; pictorial representation.

Textbook: French's "Engineering Drawing."

Drawing 1b. DESCRIPTIVE GEOMETRY.—Required of all freshmen. Four hours a week; second semester. Lieutenant Haynes.

Descriptive Geometry, pure and applied; problems on points, lines and planes; orthographic projection; auxiliary and revolved views; sections; intersections and developments.

Textbook: Schumann's "Descriptive Geometry."

Drawing 2a. MACHINE DRAWING.—Required of juniors taking the Civil Engineering Elective. Four hours a week; first semester. Lieutenant Haynes.

The object of this course is to give the civil engineering students as much training in machine drawing as may be regarded as a safe minimum for civil engineers.

Representation of bolts and nuts, screw-thread, springs, and other machine parts; detail and assembly drawing of some simple machine; tracing and blueprinting; and examination of manufacturers' drawings, with attention to drawing-office system.

Textbook: French's "Engineering Drawing."

Drawing 2b. TYPOGRAPHICAL DRAWING.—Required of juniors taking the Civil Engineering Elective. Four hours a week; second semester. Lieutenant Haynes.

Map lettering, topographical symbols, plotting surveyors' notes, contouring, and mapping field notes made in Engineering 1b.

Engineering 1a. SURVEYING.—Required of sophomores taking the Civil Engineering Elective. Three hours a week. Major Anderson.

Chaining, verniers, differential and profile leveling, compass surveying, transit surveying, note keeping, land survey computations, practical surveying problems, stadia, curves, topographical surveying, meridian determination, plane table, sextant, and adjustment of instruments.

At the end of February, the time alloted to Course 2b in Drawing is given to topographic drawing and thus continues this course.

Textbook: Breed & Hosmer's "Surveying."

Engineering 1b. FIELD PRACTICE IN SURVEYING.—Required of sophomores taking the Civil Engineering Elective. Two hours a week. Major Anderson.

Textbook: Professor's Notes.

Engineering 2a. ANALYTIC MECHANICS.—Required of juniors taking the Civil Engineering Elective. Three hours a week; first semester. Major Le Tellier.

Statics, with special attention to framed structures; center of gravity, moment of inertia, friction, rectilinear motion, curvilinear motion, rotation, work and energy, and impulse, momentum and impact.

Textbook: Poorman's "Mechanics."

Engineering 2b. MECHANICS OF MATERIALS.—Required of juniors taking the Civil Engineering Elective. Three hours a week; second semester. Major Le Tellier.

Beams, columns, shafts, elastic curve, combined stresses, compound bars and beams, and reinforced concrete stresses. This course is concerned largely with the application of principles expounded in Course 2a.

Textbook: Poorman's "Mechanics of Materials."

Engineering 3a. ANALYSIS OF STRESSES.—Required of seniors taking the Civil Engineering Elective. Two hours of recitations and two hours of drawing a week; first semester. Major Le Tellier.

Triangle of forces; composition, resolution and equilibrium of forces; funicular polygon, graphic moments, dead and wind loads; wall reactions; stress diagrams for cantilever and unsymmetrical trusses; counterbracing; three-hinged arches; towers; beams; bridges, and bridge loadings; and influence lines.

Textbook: Urquhart & O'Rourke's "Steel Structures."

Engineering 3b. ELEMENTARY STRUCTURAL DESIGN.—Required of seniors taking the Civil Engineering Elective. Two hours of recitations and two hours of drawing a week; second semester. Major Le Tellier.

The object of this course is to give an elementary knowledge of wood and steel construction as applied to simple roof trusses and highway bridges.

Properties of standard structural shapes, use of handbook, riveted joints, structural details, design and fabrication of simple steel structures, including compete design and drawing of a simple bridge.

Textbook: Urquhart & O'Rourke's "Design of Steel Structures."

Engineering 4a. HIGHWAY ENGINEERING.—Required of seniors taking the Civil Engineering Elective. Three hours a week; first semester. Lieutenant Haynes.

This course is designed to give a broad general view of the science of highway engineering. The fundamental principles are emphasized. The subject is studied from the standpoint of modern practice in the fields of economics, administration, legislation, materials, and methods.

Textbook: To be announced.

Engineering 4b. REINFORCED CONCRETE.—Required of seniors taking the Civil Engineering Elective. Three hours a week; second semester. Major Le Tellier.

Cement, plain concrete, and elementary principles of reinforced concrete design and construction.

Textbook: To be announced.

Engineering 5a. HYDRAULICS.—Required of seniors taking the Civil Engineering Elective. Three hours a week; first semester. Major Anderson.

Pressure of water on plane and curved surfaces; stability of dams; flotation and metacenter; flow of water through orifices, over weirs, in pipes and in open channels; elementary hydrodynamics.

Textbook: Russell's "Hydraulics."

Engineering 5b. WATER SUPPLY AND SANITARY ENGINEERING.—Required of seniors taking the Civil Engineering Elective. Three hours a week; second semester. Major Anderson.

Sanitation; consumption of water; quality of water; sources of supply; treatment of water. Sewerage; nature of sewage; quantity of sewage; methods of sewage disposal.

Textbook: Babbitt & Doland's "Water Supply Engineering"; Metcalf & Eddy's "Sewerage and Sewage Disposal."

Engineering 6a. ENGINEERING LABORATORY.—Required of juniors taking the Civil Engineering Elective. Two hours a week; throughout the year. Major Le Tellier and Lieutenant Haynes.

Introduction to laboratory work; use of machines and instruments; strength and deformation measurements on steel, timber, and concrete; design and testing of concrete mixes.

Textbook: Professor's Notes.

Engineering 6b. ENGINEERING LABORATORY.—Required of seniors taking the Civil Engineering Elective. Three hours a week throughout the year. Major Le Tellier and Lieutenant Haynes.

General-materials testing alternating with road-materials testing. Compressive, tensile, transverse and shearing tests on steel, concrete, wood and other materials, with measurements of deformation by strain gauges and other instruments; special attention to concrete proportioning and testing.

Standard tests and experiments on bituminous and non-bituminous road materials.

Textbook: Hatt & Scofield's "Laboratory Manual," and Professor's Notes.

DEPARTMENT OF ENGLISH

MAJOR MCGILLIVRAY, *Professor*
CAPTAIN KENNEDY, *Associate Professor*
LIEUTENANT HARRISON, *Assistant Professor*
LIEUTENANT SANDERS, *Assistant Professor*
LIEUTENANT SMITH, *Assistant Professor*

English is required of all students during the first two years, and is elective, as either a major or minor study, in the junior and senior years. In each of these years, those taking the English Elective are required to take two three-hour courses from those designated as open to juniors and seniors, the remaining hours to be made up as follows: For juniors, English History (when offered), Military Science 3, and two courses to be selected with the approval of the professor; for seniors, English History (or if already taken, an equivalent course), Military Science 4, and two courses to be selected with the approval of the professor. See the tabulation of courses with their values for the English Elective on page 32.

English 3 and 4 and English 5 and 6 are given in alternate years. English 3 and 4 will be given in 1934-35.

All who take literature courses are required to hand in each month written reports on parallel readings. The papers are graded and errors found are discussed in class. Parallel assignments thus become an important supplement to the regular courses in composition, rhetoric, and literature.

English 1a. RHETORIC AND COMPOSITION.—Required of all freshmen. Four hours a week throughout the year. Lieutenant Sanders; Lieutenant Smith.

The aim of this course is to give the student a practical command of the English sentence and a reasonable mastery of good diction. The fundamentals of grammar are carefully reviewed

and special stress is laid upon spelling, punctuation, capitalization, and errors in the use of English. In addition to frequent written exercises, weekly themes on familiar topics are assigned.

Textbook: To be announced.

English 1b. LITERATURE.—Required of all freshmen. One hour a week throughout the year. Lieutenant Sanders; Lieutenant Smith.

Readings and discussions of the best magazine articles, so conducted as to foster in the student a love of good literature as well as a lively interest in current problems.

Textbook: "Harper's Monthly Magazine" or some collection similar to "Contemporary Opinion."

English 2a. TYPES OF LITERATURE.—Two hours a week throughout the year. Required of all sophomores. Major McGillivray, Lieutenant Harrison and Lieutenant Sanders.

The more important literary types—the essay, the short story, the novel, the drama, lyrical forms—are studied with a view to giving the student an understanding of and a liking for, the principal literary species. Parallel assignments.

Textbooks: A volume of short-stories, a novel, a volume of essays, a volume of modern plays, a volume of recent British and American verse. Titles to be announced.

English 2b. RHETORIC.—One hour a week throughout the year. Required of all sophomores. Major McGillivray, Lieutenant Harrison and Lieutenant Sanders.

The course consists of studies in paraphrasing, title-making, sentence summaries, abstracts, and outlines, in connection with a theme every two weeks.

English 3. SHAKESPEARE.—Three hours a week throughout the year. Open to juniors and seniors. Major McGillivray.

This course embraces lectures on the Elizabethan stage, lectures on Elizabethan English, a careful study of the more significant plays, and parallel readings of the less significant.

English 4. ARGUMENTATION.—Three hours a week throughout the year. Open to juniors and seniors. Major McGillivray.

Assignments and discussions are followed by practice in speaking.

Textbooks: Winans' "Argumentation" or a similar text; "The Century Vocabulary Builder;" Drummond and Wagner, "Problems and Opinions" or a similar text.

English 5. ENGLISH LITERATURE FROM BEOWULF TO BURNS.—

Three hours a week throughout the year. Open to juniors and seniors. Major McGillivray.

In this survey course stress is laid on readings and discussions of principal works, rather than on literary history Parallel assignments.

Textbook: "Century Readings in English Literature," or a similar text.

English 6. ENGLISH LITERATURE IN THE NINETEENTH CENTURY. —Three hours a week throughout the year. Open to juniors and seniors. Major McGillivray.

Textbook: "Century Readings in English Literature," or a similar text.

DEPARTMENT OF HISTORY

MAJOR WILLIAMS, *Professor*
CAPTAIN COLEMAN, *Associate Professor*

History is required of all students in the freshman class. In the sophomore year, students planning to take the English, History, or Modern Language Elective must take History.

History 3 and 6 alternate with History 4 and 5; History 3 and 6 will be given in 1934-35.

History 1. HISTORY OF MODERN EUROPE, 1500-1815.—Required of all freshmen. Three hours a week. Major Williams; Captain Coleman.

After a brief survey of the contributions of the ancient world and of the Middle Ages to European civilization, the course proper deals with the important political, economic and intellectual achievements from the opening of the sixteenth century to the close of the eighteenth. It treats of the spirit of reform and revolt, the expansion of Europe and the various aspects of the "old regime." Throughout the course, everything touching English and American history is duly emphasized.

Textbook: Hyma's "Europe from the Renaissance to 1815."

History 2. HISTORY OF MODERN EUROPE, SINCE 1815.—Required of sophomores planning to take the English, History, or Modern Language Elective. Three hours a week. Captain Coleman.

The work in this class is a continuation of that begun in the freshman class. The text is supplemented by lectures to a greater exent than in History 1, and more importance is attached to collateral reading. Special attention is paid to the Industrial Rev-

olution, the rise of nationalism in Germany and Italy, the revolutionary influence of France, and the political progress of England. A careful study is made of the causes of the Great War and the temporary settlement of 1920. Throughout the course, attention is directed to the conditions under which the various movements were carried on. As in the preceding course, everything touching English and American history is stressed.

Textbook: Schapiro's "Modern and Contemporary European History."

History 3. ENGLISH HISTORY.—Required of those taking the English or History Elective. Open to other juniors and seniors. Three hours a week. Major Williams.

A careful study of the history of England from its origin to the present time is attempted. Special attention is given to the formation of the English constitution in the Middle Ages, to the growth of the limited monarchy, and to the evolution of Parliament. Emphasis is given to the characteristic institutions of the English political system and their influence upon other peoples. Throughout the course the social and economic factors which conditioned political changes are stressed. Parallel readings are assigned.

Textbook: To be announced.

History 4. AMERICAN HISTORY.—Open to juniors and seniors. Three hours a week. Major Williams.

This course is devoted to a general study of American History from the period of British Colonial administration to the present. Emphasis is laid upon the conflict of imperial colonial interest in order to understand the underlying causes of the Revolution and the growth of the spirit of independence and union. Special attention is given to the growth of the West, the development of sectional interest, and the territorial, constitutional, and social aspects of the great conflict over slavery. The gradual change of emphasis from questions growing out of this conflict and Reconstruction to the problems arising from the rapid economic and industrial development of the nation is carefully traced. Collateral reading and written reports on assigned topics are required.

Textbooks: Muzzey's "History of the United States," Vol. I; Bassett's "A Short History of the United States," Vol. III.

History 5. Hispanic-American History 1492, to the present time. Three hours a week throughout the year. Open to juniors and seniors. Major Williams.

This course is designed to introduce the student to the customs,

institutions and political theory of the peoples of Hispanic-America. Political history is not emphasized to the exclusion of social, economic and cultural development. Special attention will be directed to the diplomatic and commercial relations with the United States and Europe. Parallel reading required.

Textbook: Williams's "The People and Politics of Latin-America."

History 6. INTERNATIONAL RELATIONS.—Three hours a week throughout the year. Open to juniors and seniors. Major Williams.

The aim of this course is to give a comprehensive survey of the basic factors of world politics; of pre-war diplomacy and of post-war conflicts regarding raw materials, concessions, colonies, protectorates and spheres of influence. All students who are members of the International Relations Club are advised to take this course.

Textbook: To be announced.

Government 1. AMERICAN GOVERNMENT.—Open to juniors and seniors. Three hours a week throughout the year. Captain Coleman.

A comprehensive survey of the American political system is attempted. Instruction embraces a study of the origin, development and operation of federal, state and local institutions. Special emphasis is placed upon the underlying philosophy, basic principles and historical growth of the Constitution of the United States.

The aim of this course is to give the student an understanding of the operation of his government and an insight into the responsibilities of citizenship.

Textbook: Beard's "American Government and Politics."

DEPARTMENT OF MATHEMATICS

MAJOR HAIR, *Professor*
CAPTAIN MYERS, *Associate Professor*
LIEUTENANT SEABROOK, *Assistant Professor*

The course in mathematics for the first year is required of all freshmen. In the sophomore year those planning to take the Chemistry, Physics, Civil Engineering, or Pre-Medical Elective must take Mathematics 2; those planning to take the Business Administration Elective must take Mathematics 2a. In the junior year those taking the Physics or the Civil Engineering Elective must take Mathematics 3. In the senior year those taking the Physics Elective must take Mathematics 4a. Mathematics 3, 4a

and 4b are elective to other juniors and seniors having the necessary prerequisites.

Mathematics 1a. COLLEGE ALGEBRA. SOLID GEOMETRY.—Required of all freshmen. Five hours a week; first semester. Captain Myers; Lieutenant Seabrook.

A short review of the elements of algebra; the more important topics of higher algebra; a brief course in solid geometry.

Textbook: Palmer and Miser's "College Algebra;" Young and Schwartz's "Solid Geometry."

Mathematics 1b. TRIGONOMETRY.—Required of all freshmen. Five hours a week; second semester. Captain Myers; Lieutenant Seabrook.

A study of plane trigonometry and its applications; problems in mensuration and surveying are carefully considered; a proper proportion of the time is devoted to derivation and application of the trigonometric formulae.

Textbook: Oglesby and Cooley's "Plane and Spherical Trigonometry."

Mathematics 2. ANALYTIC GEOMETRY.—Required of sophomores planning to take the Chemistry, Physics, Civil Engineering or Pre-Medical Elective. Three hours a week; throughout the year. Major Hair.

A short course of about four weeks in spherical geometry; then plane and solid analytic geometry; a thorough study of the straight line and conics; much practice is given in exercises requiring the analytic method.

Textbook: Smith-Gale-Neeley's "Analytic Geometry."

Mathematics 2a. ELEMENTARY ANALYTIC GEOMETRY. MATHEMATICS OF FINANCE.—Required of sophomores planning to take the Business Administration Elective. Three hours a week; throughout the year. Captain Myers.

A course planned to meet the needs of those who intend to take the Business Administration Elective. While the course in analytical geometry is less comprehensive than in Mathematics 2, the elements are given with as much problem work as time permits. In Mathematics of Finance the following topics are considered: interest; discount; annuities; bonds; capitalization; depreciation; amortization; insurance; elements of statistical mathematics.

Textbook: Love's "Elements of Analytic Geometry."

Mathematics 3. DIFFERENTIAL AND INTEGRAL CALCULUS.—Required of juniors taking the Physics or the Civil Engineering

Elective. Elective to other juniors and seniors; prerequisite, Mathematics 2. Three hours a week; throughout the year. Major Hair; Captain Myers.

Differential calculus is studied from the viewpoint of the theory of limits. Thorough practice is given in differentiation and in integration. In both differential and integral calculus the application of the principles and methods of calculus in the solution of problems in engineering and science is emphasized.

Textbook: Ford's "Differential and Integral Calculus."

Mathematics 4a. DIFFERENTIAL EQUATIONS.—Required of seniors taking the Physics Elective. Elective to other seniors; prerequisite, Mathematics 3. Three hours a week; first semester. Major Anderson.

An elementary course covering the more common types of differential equations occurring in physics, mechanics, hydraulics, chemistry and electricity.

Textbook: Phillip's "Differential Equations."

Mathematics 4b. PRACTICAL ASTRONOMY.—Elective to seniors; prerequisite, Mathematics 2. Three hours a week; second semester. Major Anderson.

A course designed to meet the needs of the engineer: the celestial sphere; co-ordinate systems; determination of time, latitude, longitude, and azimuth; astronomical instruments; some field work.

Textbook: Hosmer's "Practical Astronomy."

DEPARTMENT OF MILITARY SCIENCE AND TACTICS

LIEUTENANT-COLONEL LANG, *Professor*
MAJOR VILLARET, *Associate Professor*
MAJOR RANSOM, *Associate Professor*
CAPTAIN MCGEE, *Assistant Professor*
CAPTAIN JEFFORDS, *Assistant Professor*
LIEUTENANT DINGEMAN, *Assistant Professor*
LIEUTENANT STEWART, *Assistant Professor*

Military training is required of all students whether they be in the R. O. T. C. or not. The instruction is given in the classroom or on the drill field, or both.

Military Science and Tactics 1. FIRST YEAR BASIC.—Required of all freshmen.

INFANTRY	COAST ARTILLERY
Military Courtesy and Discipline.	Military Courtesy and Discipline.
R. O. T. C. and National Defense Act.	R. O. T. C. and National Defense Act.
Duties of Private of the Guard.	Duties of Private of the Guard.
Drill and Command.	Drill and Command.
Rifle Marksmanship.	Rifle Marksmanship.
Automatic Rifle—Mechanism.	Sanitation, Hygiene and First Aid.
Machine Gun—Mechanism and Drill.	Second Class Gunner.
Sanitation, Hygiene and First Aid.	

Military Science and Tactics 2. SECOND YEAR BASIC.—Required of all sophomores.

INFANTRY	COAST ARTILLERY
Drill and Command.	Drill and Command.
Map Reading.	Duties of N. C. O.'s of the Guard.
Scouting and Patrolling.	First Class Gunner.
Musketry.	
Machine Gun — Technique of Fire.	
Duties of N. C. O.'s of the Guard.	

Military Science and Tactics 3. FIRST YEAR ADVANCED.—Required of all juniors.

INFANTRY	COAST ARTILLERY
Drill and Command.	Drill and Command.
Military Sketching.	Military Sketching.
Field Engineering.	Expert Gunner.
Howitzer Company Weapons.	
Tactics and Technique I.	
Infantry Weapons—Refresher Course.	

Military Science and Tactics 4. SECOND YEAR ADVANCED.—Required of all seniors.

INFANTRY	COAST ARTILLERY
Drill and Command.	Drill and Command.
Methods of Instruction.	Military History.
Tactics and Technique, II.	Military Law.
Military History.	Administration.
Military Law.	Field Engineering.
Administration.	Motor Transportation.
Pistol Marksmanship.	Orientation.
Orientation for Reserve Commission, including O. R. C. Regulations.	Tactics and Technique.

DEPARTMENT OF MODERN LANGUAGES

MAJOR WINSHIP, *Professor*
CAPTAIN DUFOUR, *Associate Professor*
LIEUTENANT PRICE, *Assistant Professor*

All cadets are required to take French in the freshman class. Those freshmen who present credit for two or more years in French are required to take French 1a. French 2 is required of sophomores planning to take the History, English, or Modern Language Elective, except that those sophomores who have taken French 1a are required to take French 2a. German 1 is required of sophomores planning to take the Physics, Chemistry, or Pre-Medical Elective. German 2 is required of juniors taking the Chemistry Elective. A junior or senior with linguistic ability may continue French and elect either Spanish or German; however, none of the elective courses will be given unless the number of students applying warrants the formation of a section.

FRENCH

French 1.—Required of all freshmen except those presenting credit for two or more years of French. Three hours a week. Major Winship; Lieutenant Price.

In this course the elements of French grammar are studied; special attention is given to smooth translation, practice in grammatical forms, pronunciation, and translation exercises into French.

Textbook: Huse's "Essentials of Written and Spoken French."

French 1a.—Required of freshmen who enter with two or more years of French. Three hours a week. Lieutenant Price.

Much stress is placed on reading. A rapid review of grammar is made and drill in the irregular verbs given.

Textbook: Barton and Sirich's "New French Review Grammar and Composition."

French 2.—Required of all sophomores planning to take the English, History, or Modern Language Elective, except those who have completed French 1a. Three hours a week. Captain Dufour; Lieutenant Price.

The stress in this course is on the translation of French texts. These are changed from year to year. The principal irregular verbs are thoroughly studied. Constant effort is made to perfect the student's pronunciation.

Textbook: Same as for French 1.

French 2a.—Required of those sophomores planning to take the English, History, or Modern Language Elective, who have completed French 1a. Three hours a week. Captain Dufour.

The grammar and composition work of French 1a is continued; various texts are read and a rapid survey of the history of French literature is given.

Textbook: Same as for French 1a.

French 3.—Junior elective. Three hours a week. Captain Dufour.

This course introduces the student to French literature. Selections from the most significant authors of the 17th and 18th centuries are studied. In French 3 nothing beyond the middle of the 18th century is considered. A careful study is made of the various literary movements; lectures are given on each author studied. Collateral reading and reports are required. One hour a week is devoted to composition and conversation.

Textbooks: Harper's "Anthology of French Literature." Olmstead's "French Composition and Conversation."

French 4.—Open only to those seniors who have completed French 3. Three hours a week. Major Winship.

This course is a continuation of French 3. The survey of French literature begins with the middle of the 18th century and continues to the present. The same methods are used as in French 3. Composition and conversation once a week.

Textbooks: Harper's "Anthology of French Literature;" Olmstead's "French Composition and Conversation."

GERMAN

German 1.—Required of sophomores planning to take the Physics, Chemistry, or Pre-Medical Elective. Elective to juniors. Three hours a week. Major Winship; Captain Dufour.

The object of this course is to give the student a thorough grounding in the essentials of German grammar, in pronunciation, and in ability to translate from English into German. During the second semester one hour a week is devoted to reading a simple German text.

Textbook: Voss's "Essentials of German," 5th edition.

German 2.—Required of juniors taking the Chemistry Elective. Open to those who have completed German 1. Three hours a week. Major Winship.

Two hours a week are devoted to reading; one hour to composition and conversation. A modern novel is read and the remaining time is given to scientific German. For those students who are not specializing in chemistry, the instructor will arrange hours for reading literary texts.

Textbook: Greenfield's "An Introduction to Chemical German."

SPANISH

Spanish 1.—Junior elective. Three hours a week. Major Winship. A thorough grounding in the essentials of Spanish grammar is given. Daily exercises in the translation of English into Spanish and Spanish into English are assigned. Verb blanks are filled out daily and by the end of the course all the principal irregular verbs have been learned.

Textbook: Hill's and Ford's "A Spanish Grammar for Colleges."

Spanish 2.—Senior elective. Three hours a week. Major Winship. Two hours a week are devoted to reading. A novel, a play, and selections from "Don Quixote" constitute the reading material. A constant effort is made to perfect pronunciation. One hour a week is devoted to composition.

Textbook: To be announced.

DEPARTMENT OF PHYSICS

Major Smith, *Professor*
Captain Brenner, *Associate Professor*
Lieutenant Razor, *Assistant Professor*

The department occupies the entire second floor and part of the

first floor of the east wing of Bond Hall. On the second floor are two lecture rooms, two general laboratories, apparatus rooms and laboratories for special purposes. On the first floor are located the work-shop, dynamo laboratory, and storage-battery room. The arrangement and equipment of the laboratories and lecture rooms is modern and complete. A good supply of apparatus and measuring instruments gives excellent facilities for individual experiment and demonstration work.

To meet the needs of students who intend to be electrical engineers, courses in electrical engineering are offered in the senior year. These together with the other courses in physics and required courses in mathematics, drawing, and descriptive geometry, afford a good foundation for further study in this subject.

Students taking the Physics Elective must take Mathematics 4a and are advised to take Chemistry 2.

Physics 1. INTRODUCTION TO COLLEGE PHYSICS.—Required of all sophomores. Recitations, two hours a week; laboratory practice, two hours a week; throughout the year. Major Smith; Captain Brenner; Lieutenant Razor.

The course assumes no previous knowledge of physics. It covers the less mathematical portion of mechanics, heat and electricity. The laboratory work consists of about thirty individual quantitative experiments based on the fundamental principles studied in the lecture room.

Textbook: Stewart's "Physics."

Physics 2. ADVANCED GENERAL PHYSICS.—Junior elective. Lectures and recitations, three hours a week. Major Smith; Captain Brenner.

This course is a continuation of Physics 1. It covers those portions of mechanics, heat and electricity which were not included in the earlier course, and an introduction to the study of sound and light. The subjects of mechanics and heat are studied during the first semester, and electricity, sound and light, during the second.

Textbook: Duff's "Physics."

Physics 3. LABORATORY PHYSICS.—Junior elective. Six hours a week. Captain Brenner.

Except for necessary explanation, discussion and problem work based on the experiments, the entire time of this course is devoted to laboratory work. The experiments are of a more advanced character than those included in Physics 1, and involve the use of most of the standard instruments of physical measurement. About seventy experiments are performed, affording a study from

the laboratory standpoint of most of the topics considered in Physics 2.

Physics 4. ADVANCED PHYSICS.—Senior elective. Lectures and recitations, three hours a week; laboratory work, six hours a week. Major Smith; Captain Brenner.

The subject matter of this course will be varied from year to year to meet the needs of the students electing it. The course for 1933-34 is as follows:

First semester: WAVE-MOTION, SOUND AND LIGHT.—The general equations of wave-motion are developed and a study is made of their application to sound and light. The laboratory work consists of eight experiments in sound and about twenty-five in light.

Textbook: Robertson's "Physical Optics."

Second semester: ELECTRON PHYSICS AND RADIO COMMUNICATION.—Maxwell's theory of electro-magnetic waves is first presented and then its experimental verification by Hertz. The practical application of the theory to radio communication is studied both theoretically and experimentally. A special study is made of thermionic emission in electron tubes, photo-electric cells, cathode ray tubes and their application to television.

Textbook: Morecroft's "Elements of Radio Communication."

Optional courses will be offered in other years in Thermodynamics or Modern Physics.

Electrical Engineering 1. ELECTRICAL ENGINEERING.—Senior elective. Lectures and recitations, three hours a week. Lieutenant Razor.

An introductory course in electrical engineering, covering the theory of direct and alternating currents as applied to commercial machinery.

Textbook: Cook's "Elements of Electrical Engineering."

Electrical Engineering 2. ELECTRICAL LABORATORY.—Senior elective. Laboratory work, six hours a week. Lieutenant Razor.

A study is made from the laboratory standpoint of the principal types of direct and alternating current generators and motors, and of motor-generators, rectifiers and transformers. The machines are operated under practical working conditions and their characteristic curves obtained. The first semester is devoted to a study of direct current machinery and the second semester to alternating currents.

Textbook: Cook's "Elements of Electrical Engineering."

DEPARTMENT OF BUSINESS ADMINISTRATION

MAJOR LEWIS, *Professor*
LIEUTENANT TIEDEMANN, *Assistant Professor*
LIEUTENANT TIBBETTS, *Assistant Professor*

Modern business has become so large in the size of industrial units and so complex in organization that a mastery of its theory and practice can no longer be acquired through apprenticeship. Today no single industry or business can give so adequate a training to its beginners as can be obtained in the department of business administration in a good college. Such college training is now the best method of equipping a man for success as a business leader.

It is the purpose of the department at The Citadel to give instruction not only in the fundamental principles of business administration, with accounting and economics as a base, but also in the solution of problems through the application to them of these principles.

ECONOMICS

Economics 1a. ECONOMIC HISTORY.—Required of sophomores planning to take the Business Administration Elective. Three hours a week; first semester. Lieutenant Tiedemann.

The early economic institutions, and how they developed into the modern institutions for carrying on business.

Economics 1b. ECONOMIC THEORY.—Required of sophomores planning to take the Business Administration Elective. Three hours a week; second semester. Lieutenant Tiedemann.

The old and new economic concepts of society; wealth, capital, income, specialization, exchange, production, land, labor, risk, money, banking, price, supply and demand, distribution and consumption.

Economics 2. GENERAL ECONOMICS.—Elective to juniors and seniors in all departments. Three hours a week; throughout the year. Lieutenant Tiedemann.

Our present economic structure; theories of price and price making; financial institutions; business organization; distribution of wealth and income; public finance and taxation; Socialism, Communism, Sovietism, and Marxianism.

BUSINESS ADMINISTRATION

Business Administration 1. ACCOUNTING.—Required of juniors

taking the Business Administration Elective. Four hours a week; throughout the year. Lieutenant Tiedemann.

Detailed discussion of the various forms of records which facilitate the recording and analysis of business transactions, with primary emphasis on the method of recording a transaction and preparation of reports from such records.

Business Administration 2. BUSINESS LAW.—Required of juniors taking the Business Administration Elective. Three hours a week; throughout the year. Lieutenant Tiedemann.

The legal subjects of fundamental importance for a successful business.

Business Administration 3a. RAW MATERIALS.—Required of juniors taking the Business Administration Elective. Three hours a week; first semester. Major Lewis.

A consideration of raw materials in the United States: their variety, location, and potential and actual worth.

Business Administration 3b. MARKETING.—Required of juniors taking the Business Administration Elective. Three hours a week; second semester. Lieutenant Tibbetts.

The problems of the manufacturer in securing the proper channels of distribution; the comparative value of these channels; the market for potential buyers; sources of statistical information; price determination and all other factors dealing with the distribution of agricultural and manufactured goods. Practical problems are submitted to the class.

Business Administration 4a. GOVERNMENT FINANCE.—Required of juniors taking the Business Administration Elective. Three hours a week; first semester. Lieutenant Tibbetts.

A study of the machine set up for the spending of government revenues; the budget; custody of funds; borrowing; and relation of indebtedness to good financing. A short introduction to show the growth of public expenditures and services.

Business Administration 4b. TAXATION.—Required of juniors taking the Business Administration Elective. Three hours a week; second semester. Lieutenant Tibbetts.

The development of the theories of taxation; incidence; what the "traffic will bear;" and new sources; the practical application of these theories in the United States, and the interrelation of federal, state, and local taxation.

Business Administration 5. ACCOUNTING.—Required of seniors taking the Business Administration Elective. Four hours a week; throughout the year. Major Lewis.

The corporation and its use of accounts as a tool of management; the methods of handling capital stock, issue and redemption, treasury stock, no-par stock, profits, sinking funds, combinations and consolidations; and the evaluating of items founds in the balance sheet in order to arrive at a true surplus.

Business Administration 6a. BUSINESS ORGANIZATION.—Required of seniors taking the Business Administration Elective. Three hours a week; first semester. Major Lewis.

A comparison of all types of business organization: the partnership, association, corporation, trust, and consolidation. The promoting, legal, legislative, and operating advantages of each type are discussed with the view of determining which is more applicable to various businesses.

Business Administration 6b. CORPORATION FINANCE.—Required of seniors taking the Business Administration Elective. Three hours a week; second semester. Major Lewis.

Raising and disposing of funds; principles guiding executives in keeping their capital, bonds, and working capital employed to the most efficient degree; the channels through which securities may be purchased or sold; dividend policies; conservation of capital; investment of funds.

Business Administration 7a. RAILWAY TRANSPORTATION.—Required of seniors taking the Business Administration Elective. Three hours a week; first semester. Major Lewis.

The development of the railroad systems, the theories of rates and rate making, and the rise and theories of regulation by governments; the problems of the economic justification of the railroad and its relation to other forms of transportation.

Business Administration 7b. FOREIGN TRADE.—Required of seniors taking the Business Administration Elective. Three hours a week; second semester. Lieutenant Tibbetts.

Channels of distribution for surplus goods that have to find their outlet in foreign countries; foreign exchange; supply and demand; prices and appeals; and transportation methods.

Business Administration 8a. MONEY.—Required of seniors taking the Business Administration Elective. Three hours a week; first semester. Lieutenant Tibbetts.

Various money systems; the theories of money; the relation of money to changing prices.

Business Administration 8b. BANKING.—Required of seniors taking the Business Administration Elective. Three hours a week; second semester. Lieutenant Tibbetts.

The Federal Reserve System and its economic importance; the changes and modern tendencies in banking; the present banking organization into departments to meet the modern need for banking facilities; the relations of the banks with the federal and state governments.

DEPARTMENT OF EDUCATION

MAJOR PROUTY, *Professor*
LIEUTENANT LYON, *Assistant Professor*
LIEUTENANT ACHURCH, *Assistant Professor*

All the courses in this department are elective except that juniors taking the Pre-Medical Elective are required to take Psychology 1.

Psychology 1. GENERAL PSYCHOLOGY.—Required of juniors taking the Pre-Medical Elective; elective to juniors and seniors. Three hours a week. Major Prouty.

The primary purpose of this course is to present as inclusively as possible the more generally known and accepted facts and hypotheses of modern experimental psychology, with the ultimate purpose in view of leading the student to approach objectively the problem of understanding himself and other people, especially in connection with the adjustments necessary between individual needs and the demands and conditions of the environment.

Textbook: Warren & Carmichael's "Elements of Human Psychology."

Psychology 2a. SOCIAL PSYCHOLOGY.—Senior elective. Three hours a week; first semester. Major Prouty.

A study of the social factors of individual behavior and the relation of the individual to the social order. Collateral reading and written reports on assigned topics constitute an essential part of the work.

Textbook: Folsom's "Social Psychology."

Psychology 2b. SOCIAL PROBLEMS.—Senior elective. Three hours a week; second semester. Major Prouty.

The more outstanding problems of human relationship are studied from the point of view of social trends and individual reactions. The course comprises a study of the situation out of which problems arise as well as suggested ways of meeting such problems.

Textbook: North's "Social Problems and Social Planning."

Education 1a. INTRODUCTION TO EDUCATION.—Elective for juniors and seniors. Three hours a week; first semester. Lieutenant Lyon.

Designed to orient the student in his first approach to the scientific study of educational problems and skills, this course is a preview of the whole field of education, with especial emphasis upon objectives and the social implications of our educational institutions.

Textbook: J. H. Blackhurst's "Introducing Education."

Education 1b. SECONDARY EDUCATION.—Elective for juniors and seniors. Three hours a week; second semester. Lieutenant Lyon.

The purpose of this course is to acquaint the prospective secondary school teacher or principal with the function and problems of this unit of our public school system. The course includes the following major topics: the historical background, development, and present-day trends in the organization and administration of our secondary institution; data and studies concerning the secondary school pupil; curriculum problems and objectives; and pupil guidance.

Textbook: To be announced.

Education 2. EDUCATIONAL PSYCHOLOGY.—Elective for seniors. Three hours a week. Psychology 1 is a prerequisite. Lieutenant Lyon.

The purpose of this course is to present to the prospective teacher in a usable form the essential contributions of the various fields of psychology applicable to the school situation. Emphasis will be placed upon the mental and physical development of the school child and the significance of this fact of growth to teaching methods.

Textbook: S. L. Pressey's "Psychology and the New Education."
